EcoUrban Aire

No added Urea Formaldehyde (NAUF) cabinetry system featuring domestic, fiber-based, engineered veneer

EcoUrban Steel

All stainless steel cabinetry system featuring proprietary, weldless assembly

EcoUrban Collection is a new line of environmentally responsible, American-made, contemporary cabinetry for kitchen, bath and office.

EcoUrban Aire EcoUrban Aire in clean and sophisticated quartered maple finish. All NAUF box and door construction. Top-tier, slow close door and drawer hardware with brushed stainless steel pulls. Indian Head Park, Illinois.

EcoUrban Steel Ultra modern custom sized EcoUrban Steel installation in Classic #4 Finish. All stainless box and door construction with premium tier hardware throughout. Sueded Finish stainless counter tops. New York, New York.

Sustainability is our priority

We start with design

Our products are free of superfluous detail and manufacturing redundancy; we optimize material usage and minimize waste. The resulting aesthetic is clean, modern and beautiful.

Next comes sourcing

We strive to use the most environmentally friendly, domestically-sourced components for all assemblies. We use only NAUF (No Added Urea Formaldehyde) substrate and NAUF glues for our EcoVeneers, with 100% recycled cellulose fibers and water-based phenolic coatings.

Now, the manufacturing

State-of-the-art computerized fabrication and assembly technologies complete our commitment to total sustainability. Advanced hardware and software systems eliminate waste and minimize material consumption.

In developing the EcoUrban suite our goal was to offer the market a Eurostyle, standardized system sourced and built domestically and sustainably.

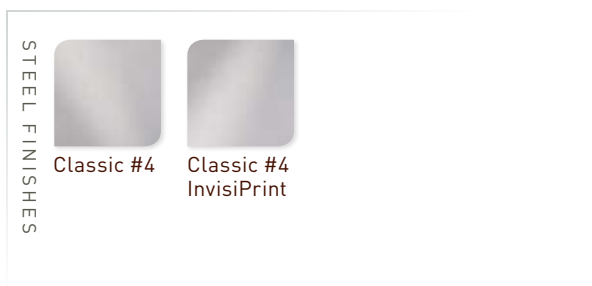

Choose from EcoUrban Aire, a complete and economical cabinet line using low VOC processes and domestic, fiber-based, engineered EcoUrban Veneer; or EcoUrban Steel, an all stainless steel system using our proprietary, weldless assembly.

Our Collection

EcoUrban Aire No added Urea Formaldehyde (NAUF) cabinetry system featuring domestic, fiber-based, engineered veneer.

EcoUrban Steel All stainless steel cabinetry system featuring proprietary, weldless assembly.

Specifying your project is simple

- 1 First, select exterior door finish: EcoUrban Aire Veneer, EcoUrban Aire Chroma, or EcoUrban Steel
- 2 Next, select interior cabinet style: EcoUrban Aire, EcoUrban Aire-FSC*, or EcoUrban Steel

*Additional Chroma finishes available upon request
Please contact us for samples

All combinations include our top-tier hardware packages

*Forest Stewardship Council

About LEED

Leed Certification

LEED is the preeminent green building rating system developed by the US Green Building Council. LEED creates a common standard of measurement for green building by awarding credits towards building certification. Various green products and sustainable practices contribute towards these credits; resulting in Platinum, Gold, Silver or Certified status. EcoUrban Collection will work with your LEED AP to develop the best LEED credit strategy for your project.
